RAMI ABDUL HAMID

Software Engineer • Mobile (Flutter) Developer

Damascus, Syria (open to relocation) | +963 988 795 032 | rami.abd.alhamed.333@gmail.com
LinkedIn | GitHub | Portfolio

Software Engineer specialising in mobile development, with 3+ years building and shipping production Flutter applications across HR, clean-energy, recruitment, and event-booking domains. Strong in Clean Architecture, Bloc/GetX state management, and RESTful API integration, with hands-on experience owning products end-to-end from architecture to App Store and Google Play release. Bachelor's in Software Engineering (University of Damascus, 2025). Open to relocation and international opportunities.

TECHNICAL SKILLS

Languages: Dart, Java, Python, C++, JavaScript, HTML, CSS
Mobile & Frameworks: Flutter, GetX, Bloc/Cubit, Clean Architecture, NFC & QR integration, responsive UI, localization & RTL
Integrations: Payment gateways (HyperPay, Apple Pay, Google Pay), Google & Apple sign-in, push notifications (FCM)
Backend & Tools: RESTful APIs, Firebase, Git, Postman, Jira
Practices: Agile / Scrum, unit & widget testing, technical documentation, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Flutter Developer — Innovatorz *Jun 2026 – Present*
Saudi Arabia (Remote)

- Developed **Enjo**, a consumer app for discovering events, booking tickets, and paying online; submitted to Google Play and the App Store (currently in store review).
- Integrated HyperPay checkout with card, Apple Pay, and Google Pay payments through custom native Android/iOS bridges (Flutter MethodChannels).
- Built the ticketing experience: QR tickets cached for offline access, ticket and order PDF downloads, and order history with filtering and pagination.
- Implemented Google & Apple sign-in, guest mode, FCM push notifications, Arabic/English with full RTL, dark mode, and multi-currency pricing.
- Developed a **QR Scanner** app for validating event tickets at entry; also submitted to Google Play and the App Store (currently in store review).
- Applied Clean Architecture with Bloc/Cubit, dependency injection, multiple build flavors, and unit/widget test coverage.

Flutter Developer — Logico *Sep 2025 – Apr 2026*
Damascus, Syria

- Developed an HR management system in Flutter, delivering modules for employee data and internal workflows.
- Applied Clean Architecture and Bloc/GetX state management to keep the codebase scalable and maintainable.
- Partnered with cross-functional stakeholders to align features with operational goals.

Flutter Developer — Alhdara *Sep 2024 – Sep 2025*
Damascus, Syria

- Owned end-to-end development of a solar energy sales and service request platform in Flutter, from architecture through to release.
- Engineered NFC and QR-based validation to confirm workshop and job completion in the field, reducing manual verification effort.
- Delivered responsive, high-performance interfaces integrated with RESTful backend APIs.

Flutter Developer — Forsa *Jan 2024 – Aug 2024*
Damascus, Syria

- Built a job-matching platform with search, application tracking, and video-profile features.
- Optimised search and filtering for usability, and collaborated with backend teams on secure, scalable delivery.

EDUCATION

B.Sc. in Software Engineering — University of Damascus *2020 – 2025*

- Relevant coursework: Data Structures, Algorithms, Mobile App Development, Software Architecture.
- Completed 8+ academic web and mobile projects.

CERTIFICATIONS

- English Language Certificate — Level 5A, New Horizons Center (professional working proficiency).
- Effective Business Website — HP LIFE / Understanding Your Target Audience — HP LIFE.

VOLUNTEER EXPERIENCE

- SAAED Team (2020–2021): supported weekly food distribution for 500+ families.
- Damascus International Book Fair, Ministry of Culture: coordinated hall logistics and operations; received a certificate of appreciation.
